

EXCLUSIVE AND CUSTOMISED POOL MANUFACTURE

POOL SYSTEMS
FROM ODENWALD POOL.

ODENWALD POOL

>> ABOUT ODENWALD POOL

ODENWALD POOL

30 YEARS' PRODUCTION KNOW-HOW.

ODENWALD POOL has produced polyester basins for completely customised swimming pools in Odenwald, Germany. Founded by Georg Schwinn in 1974, the company has made a name for itself as a skilful partner in building swimming pools and polyester processing in Germany and internationally. We are able to continuously create new and exclusive solutions for our customers, thanks to our many years of experience in swimming pool construction and plastics processing.

ODENWALD POOL

HIGHEST QUALITY.

We place a great deal of value on our continuous quality control processes.
We guarantee a long lifetime and safety for quality products that are „made in Germany.“

ODENWALD POOL

COMMITMENT AND INDIVIDUAL SOLUTIONS.

Our company focuses on key strengths: committed staff, a modern production facility for all swimming pool modules, where all customers' wishes are incorporated into the most modern solutions. The company was acquired in 2001 by staff that had worked there for many years, thus ensuring that the company's traditional values would be continued, while incorporating fresh, new ideas. Our customers are extremely pleased with our high-quality work, new techniques and our flexibility.

Guenter Klinger and Friedhelm Schuch, the Managing Directors:
„We specialise in custom solutions - we are not mass-producers.“

>> INFINITY POOLS

OPEN VIEWS.

The high waterline of ODENWALD POOLS is particularly attractive. The swimmer doesn't see a pool's wall; rather, he has a free and open view of the world. The waterline ends at the blue sky.

INFINITY POOLS

MODULAR SYSTEM.

ODENWALD POOL's segmented basins can be precisely installed into the architecture of any pool building and any garden. They fit well into the blueprints, are produced on order and are installed on-site by our own experienced pool installation specialists. The vinyl ester panels use ODENWALD POOL's specific pool system and are installed by hand at the construction site. These are supplied in a size of up to 3.20 x 2 metres.

No expensive transport of a completed pool is required. As a rule, no cranes are needed.

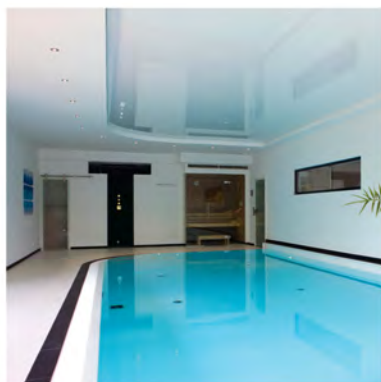

The parts are joined and sealed using a nut and spring system and special adhesive at the construction site. Also special parts, such as steps, curves and of course spillways are added or installed. Many varieties of gutter systems are available.

INFINITY POOLS /

FORM AND AESTHETICS.

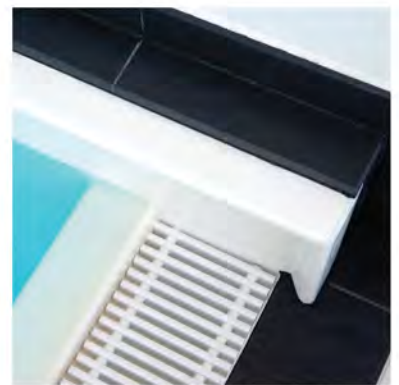

One can create outstanding swimming pool rooms with ODENWALD POOL's basin system. The form and aesthetics of the pool are adapted to the interior architecture and can be integrated into any design. Design elements such as steps, gutter forms, 1-, 2- or 3-sided gutters, rotundas, etc. can be integrated into every ODENWALD POOL swimming pool to loosen strict rectangular shapes.

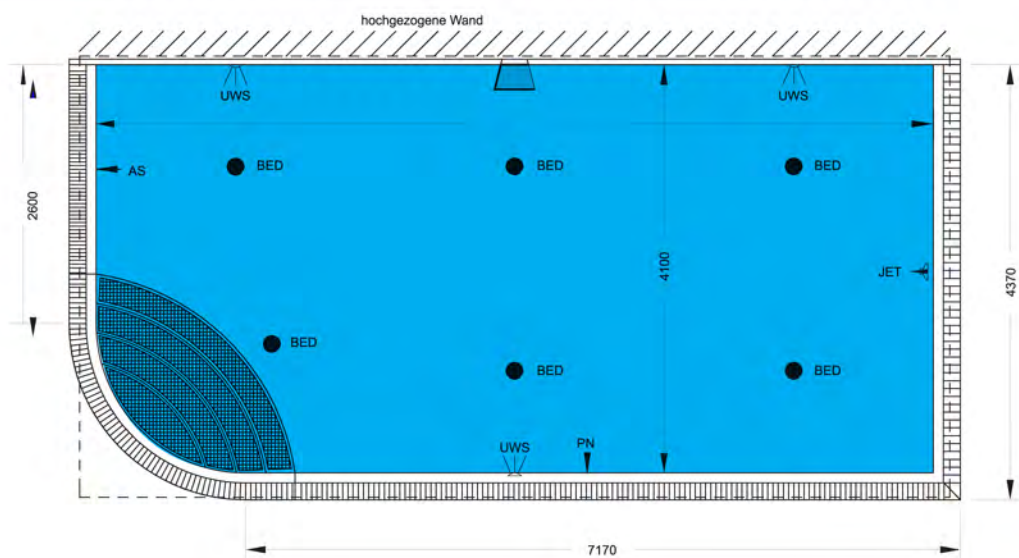

INFINITY POOLS /

A VARIETY OF GUTTERS.

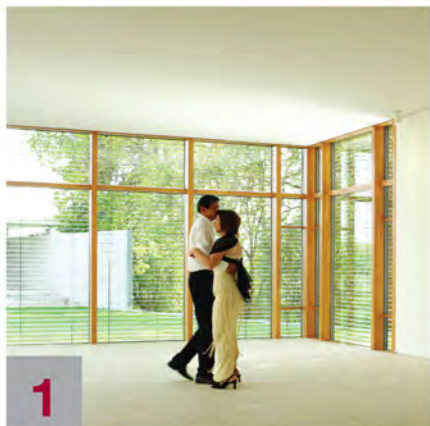

ODENWALD POOL specialises in creating special overflow gutter systems, producing them to clients' specifications. Whether Finnish or Wiesbaden gutters, St. Moritz gutters or special gutter construction - ODENWALD POOL customises the gutter system to the client's specifications. We deliver gutters with classic plastic grids or covered with natural stone or other materials.

INDIVIDUAL BASIN PLANNING FROM ODENWALD POOL.

INFINITY POOLS //

1

SPACE MIRACLE.

ODENWALD POOL has shown in many projects its ability to deliver design and technical solutions. As with this swimming pool: The basin from ODENWALD POOL is perfectly covered by a concrete panel. It is impossible to discern that a pool is hidden underneath. The concrete panel moves down with the push of a button and reveals the swimming pool. This technique requires extraordinary precision, so that the sinking floor can be precisely raised and lowered to the nearest millimetre.

This solution was developed jointly by a partnership formed by Bunz Bädertechnik and ODENWALD POOL.

>> NATURAL STONE GUTTERS

EXCLUSIVE
CONSTRUCTION:
A GUTTER COVERED
WITH NATURAL STONE

NATURAL STONE GUTTERS.

ODENWALD POOL delivers pools with infinity gutters in many varieties. Should you not want infinity gutters with plastic grills for aesthetic or other reasons and prefer covering the gutters, we can accommodate you.

ODENWALD POOL makes it possible to produce a variety of different gutter covers made of natural stone, working with on-site natural stone suppliers.

The pool's spillway functions properly, even with a natural stone cover. The gutter stones can be chosen as a transitional cover in the swimming pool or on the terrace.

NATURAL STONE GUTTERS /

LUXURIOUS SWIMMING POOL LININGS.

For customers who prefer a stone look to a plastic lining, ODENWALD POOL also offers customised solutions.

Not only the spillway gutters, but also the swimming pool itself or parts of the swimming pool can be lined with luxurious stones - as desired by the builder.

>> SKIMMER POOLS

SKIMMER POOLS - A PRICEWORTHY ALTERNATIVE.

ODENWALD POOL offers priceworthy skimmer pools in addition to swimming pools with infinity gutters. Skimmer pools are based on fibreglass vinyl ester plastic, a material that has proven itself for many years in swimming pool construction as well as in high-quality boat building. The plastics used are covered with a chemical-resistant top gel coat layer. ODENWALD POOL ensures their quality and stability. The swimming pools can be equipped in many ways: for example with entry stairs, which can be placed on any side of the pool. The stairs, which match the pool's colour or can be set apart with another colour, are slip-free and easy to use thanks to their structure. Further possible equipment details include a roller shutter, a waterfall shower, massage jets, counter-currents and additional installed items.

SKIMMER POOLS

A VERSATILE MATERIAL.

Swimming pools from ODENWALD POOL are manufactured with expert precision, high quality and the reliability one can expect from a medium-sized company. The starting material is a very modern material that boasts proven performance over many years: glass-reinforced vinyl ester plastic, called VEP. Resins are reinforced with glass fibres, which combine the high chemical resistance of the plastic resins with the solidity of glass.

THE BENEFITS:

high flexibility during processing with low weight,
high surface quality with corrosion resistance.

ODENWALD POOL supplies custom swimming pools to the customers' strict requirements. The builder is completely free in choosing the accessory details.

TIMELESS BEAUTY
Is represented by the swimming pools from ODENWALD POOL. A large number of these swimming pools have been produced according to this system over the past 38 years.

>> SKIMMER POOLS /

INTERIOR
OR EXTERIOR.
PERFECTION IN
FORM AND DESIGN.

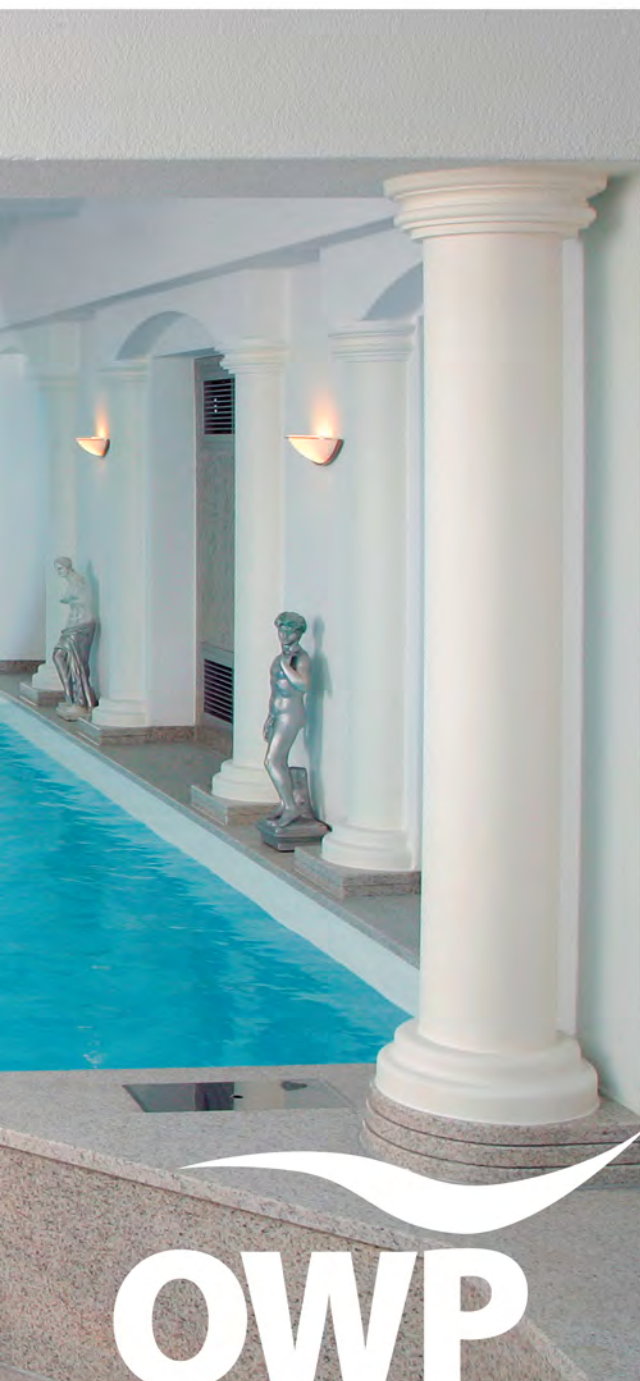

CUSTOMISING EXPERTS.

Swimming pools from ODENWALD POOL can be customised to the individual needs of the builder and local circumstances thanks to their unique structure. Due to its modular construction, nearly all forms and sizes are realizable.

The planner and architect have nearly unlimited choices. Examples for this variety of design forms are free pool shapes, floor-level pools or swimming pools with deep gutters.

SKIMMER POOLS /

ALL FORMS MADE OF PLASTIC.

STEPS

Swimming pools from ODENWALD POOL can be equipped with a wide variety of stair systems. An example is a Roman entry stairway, which can be installed on any side of the pool. The steps are slip resistant and can be produced in any colour. Many other stair systems can be supplied.

INSTALLATIONS

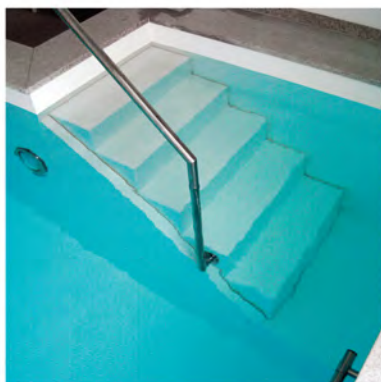

Equipment details can be, for example:

Spotlights, counter-current systems, floor jets, massage jets or waterfall showers, which are integrated into the swimming pool from ODENWALD POOL. Builders can complete a sporty swim training session or enjoy a warm water massage.

SITTING AND LYING

Swimming pools from ODENWALD POOL can also be equipped with air jet seats, benches or bubble rotundas with massage nozzles. This adds more fun to bathing and loosens the square edges of the pool by providing architectural options.

>> PHYSICAL THERAPY POOLS

POOLS FOR PROFESSIONALS: THE PHYSIO POOL.

ODENWALD POOL has shown with the physio pool how elegance and functionality can be combined in an outstanding way in one swimming pool. The physio pool features a beautiful shape with an elegant form and side glass panels, plus it offers all of the functions that are required today in a therapeutic or physio pool. The side glass panels make it possible for therapists to observe and check patients' movements.

The freely supporting pool construction consists of glass fibre-reinforced plastic, stainless steel covering and compound safety glass, which is outstanding for use in swimming pools thanks to its pressure resistance and special manufacture. The outside and inside stairs are made of stainless steel, which makes it easy for the patient to comfortably enter and leave the pool.

>> SUN POOLS

THERESA - Wellness - Gourmet Hotel ****SUPERIOR, Zillertal, Tyrol

SUN POOLS.

There are other special product series offered by ODENWALD POOL in addition to the physio pool, such as sun pools with or without benches. The vinyl ester resin compound is suitably changed, so that the VEP surface can stand temperatures of 34 deg. C or more, in order to make the material even harder and more resistant. This special solution enlarges the possible range of applications offered by ODENWALD POOL, giving its swimming pools a competent position in the market.

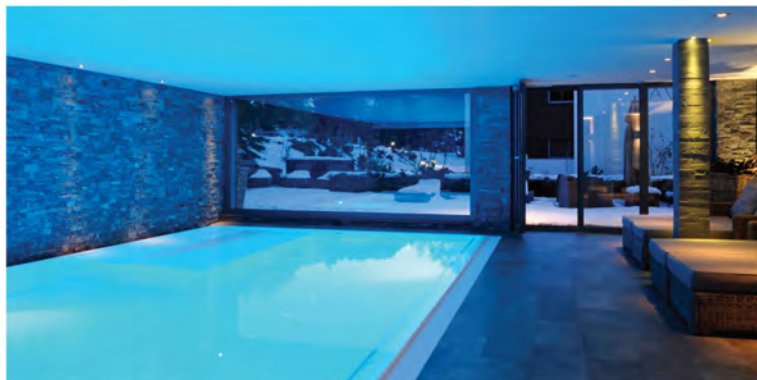

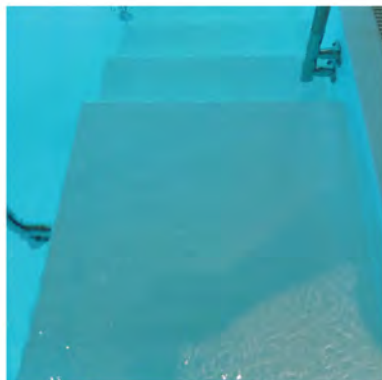

>> MOVEMENT POOLS

La Val, Bergspa Hotel Brigels, Switzerland

MOVEMENT POOLS.

Swimming pools are no longer only used for active swimming, but also for relaxation and for drifting through warm swimming pool water. Therefore pools are equipped with a number of attractions, such as air bubbles and massage nozzles, as well as air nozzle benches and lounge benches. Movement pools can often be found, for example, in skiing hotels. Skiers on holiday love to soak in comfortably warm swimming pool water after a day on the slopes. ODENWALD POOL's movement pools are designed for high water temperatures and are delivered with all the attractions.

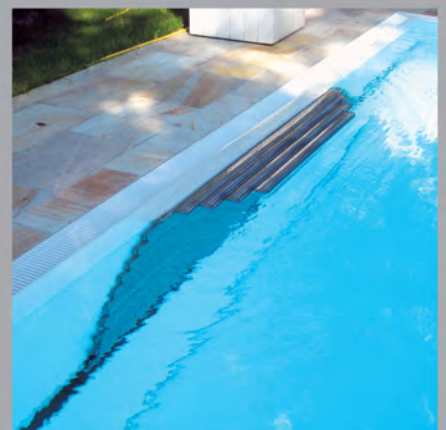

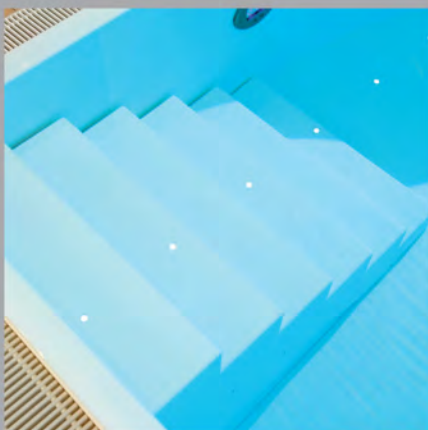

>> CREATIVE SOLUTIONS

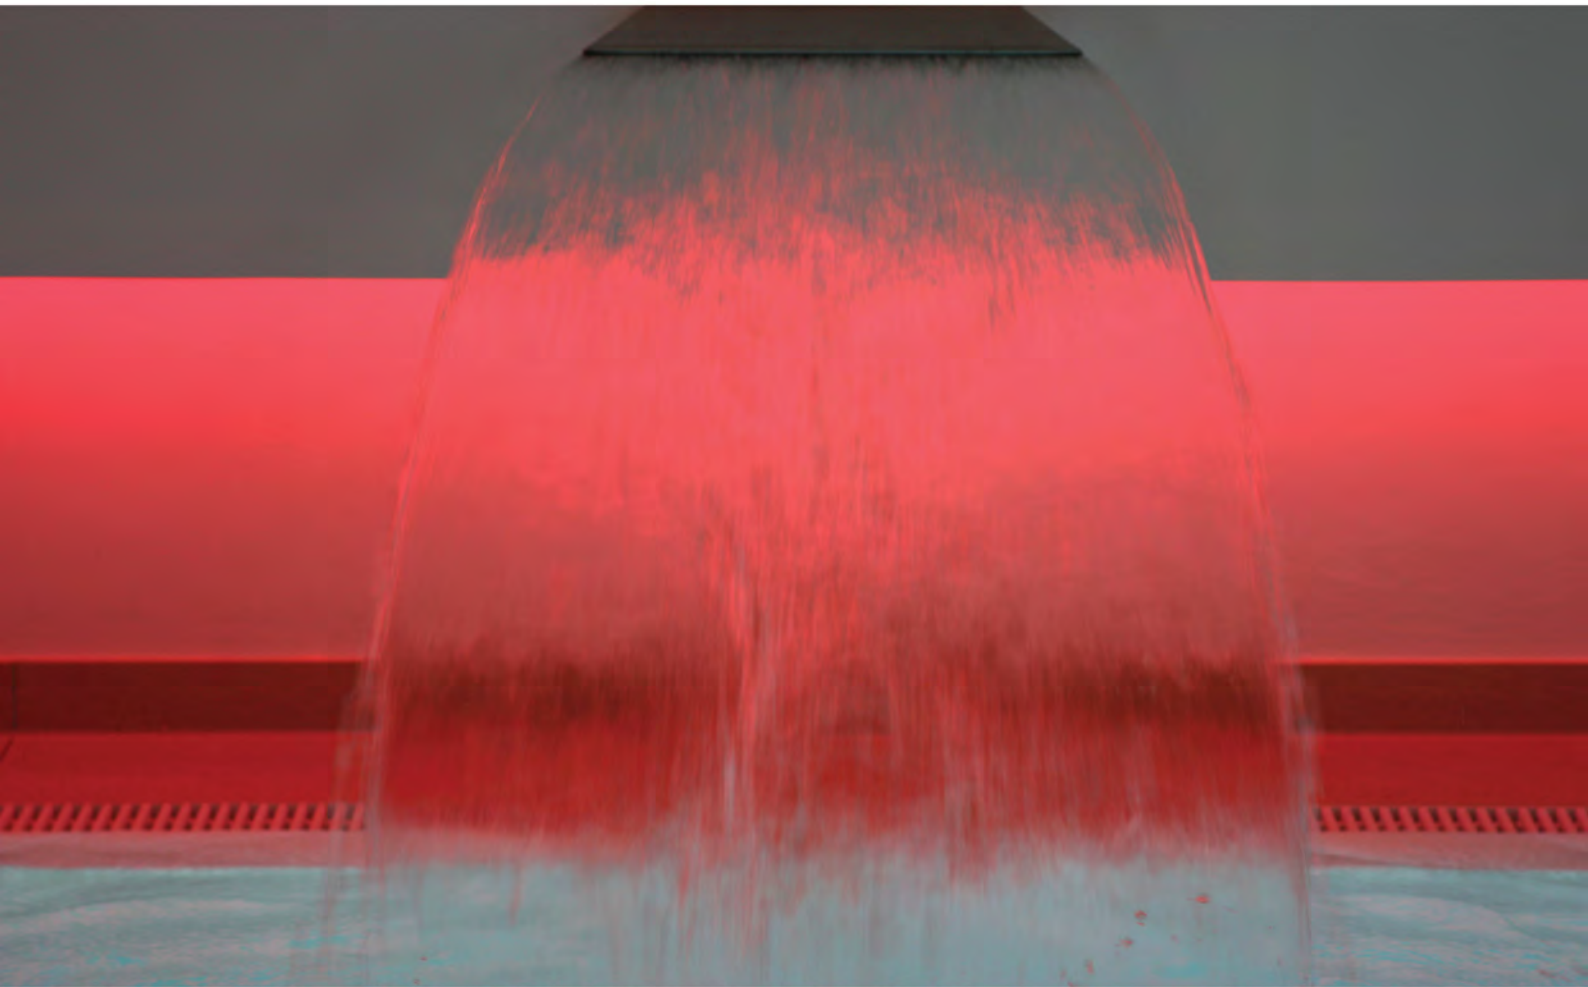

CUSTOM SWIMMING POOLS.

ODENWALD POOL's swimming pools are offered in an astonishing variety of creative design options. The swimming pool can be customised to any space. Even existing columns, niches, curves or other features in the space offer no obstruction.

Installations such as floor jets, floor bubblers, spotlights and further attractions can be added in all areas.

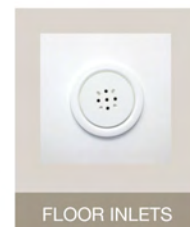

>> INSTALLATIONS

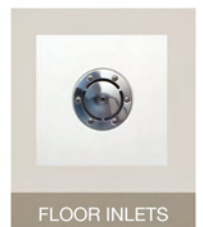

CUSTOM VEP INSTALLATIONS.

Perfection lies in the details. Whether waterfall showers or massage nozzles: Customers have the option of various water attractions in different forms and colours.

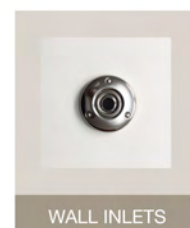

ODENWALD POOL offers the customer a wide variety of attractions to fulfil any desire or taste.

>> OWP QUALITY STANDARD

The swimming pool is manufactured as a load-bearing structure. Only a ring anchor above and a concrete edge on the bottom are required, as shown in this technical drawing. If desired, swimming pools can also be manufactured freestanding.

The surfaces, whether VEP or PVC, are sealed and surface treated, which prevents the formation of lime and metal layers. The swimming pools thus receive a high-gloss and easy-to-clean surface.

We place a great deal of value on our continuous quality control processes. We guarantee a long lifetime and safety from quality that is „made in Germany.“

LIGHTING.

Would you like to change your swimming pool into a coloured sea? We offer you LED colour spotlights, customised for your pool. The powerful LED lights turn the pool into a coloured sea. The LED spotlights are small, compact and easy to operate. One can run through various colours or set desired colours. This can be done on a custom basis and according to your mood..

SURFACE COLOURS.

You can also choose different colours with your ODENWALD POOL, which works best with the surface of your swimming pool. Various VEP colours such as white, papyrus, light blue, anthracite or sand can be chosen. PVC swimming pools are first made in white.

The ODENWALD POOL team would be happy to consult with you on the options.
